Changes

Opposite the edition 2010-12 the editor were updated.

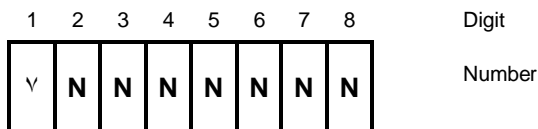

General Information

The “med-article number” is the code number system of the group medical systems for products and technical documents.

The “med-article number” is a special number system according to SN 01000-2 and approved for the non-internal exchange of information according to Z-RS 16/77 and ZPL 5/90.

The allocation/specification of med-article numbers is only done in group Med. The med-article number is also being approved by the number processing program NORM.

Number Scheme

N is „0“ to „9“

Y is „1“ to „9“; Attention, if Y is „0“ Siemens-Code-Number-System until October 2003
